

Termite Treatment: What it Was. . .What it is. . .

***Jeffrey Rogers, Environmental Program Planner, VDACS-
Office of Pesticide Services***

This not your father's termite treatment anymore...many factors such as chemistry, product labels, EPA, etc. have changed the way we do things. This session will give the opportunity to understand how changes in the federal requirements affect state regulation and why. You will also have the opportunity to ask all those questions you would like to ask "before the inspection".
